

in the metal department, then I started to search right away; that was the only spot I could find; I could tell it was blood by looking at it. I can tell the difference between blood and other substances. I found the hair some few minutes afterward--about 6 or 8 strands of hair and pretty long. When I left the machine on Friday I left a piece of work in there. When I got back the piece of work was still there, It had not been disturbed. The machine was in the same position in which I left it Friday night, there was no blood under this machine. There is no number or amount on the envelope I found, and no name on it, just a little loop, a part of a letter. Yes I have been aiding Mr. Dorsey and the detectives search the building. Yes, Mr. Dorsey subpoenaed me to come to his office, it was a State subpoena. I gave him an affidavit.

MELL STANFORD, sworn for the State.

I have been working at the National Pencil company a little over two years. I swept the whole floor in the metal room of Friday, April the 25th. On Monday there after I found a spot that had some white ^{on second floor near dressing} haskoline over it, That wasn't ^{room} thereon Friday when I swept between 9 and 12 o'clock. I use a small broom in sweeping. I saw a big cane broom standing by the waste metal room on Monday about six feet from where the blood was found. The spot looked to me like it was blood, with dark spots scattered around. It looked like the large broom had been used in putting the haskoline on the floor by the impressions or scratches of the cane in the floor.

CROSS EXAMINATION.

I was a sweeper in the metal room. Yes, they have regular negro sweepers there for the building. I swept it all up because the negro wasn't there. It took me from 9 till 12 to sweep the whole floor. I moved everything and swept everything. I swept under Mary Phagan's and Barrett's machine.
