

of the metal room doors.. They were six feet wide exactly from
jab to jab. The doors are usually open. If any one came up the
stair case and turned to the office, they could see through the
metal room doors. The floors of the metal room are very dirty .
I don't know if the window are clean, but you can see through them.

I. U. KAUFFMAN, Sworn for the defendant.

I made a drawing of the Selig Residence on Georgia Avenue, in
this city, showing the kitchen, dining room, the reception room,
parlor and passage way between the kitchen and dining room. The
mirror in the dining room is in the side board as shown on the plat
(defendant's exhibit 52). It is fourteen feet from the kitchen
door to the passage way in the dining room and the passage way is
a little over two feet. Standing in the back door of the kitchen
room against the north side side of the door, I could not see that
mirror, because of the partition between the passage way and the
dining room. On the south side of the kitchen door you would have
less view than on the north side and could not see the side board
wherein the mirror is located at all. It is 175 feet from the Selig
home to the corner of Washington and Georgia Avenue and 271 feet
from the Selig home to corner of Pulliam St. and Georgia Avenue,
as shown on the plat (defendants exhibit 53.) I made a plat of
the National Pencil Company plant on Forsyth St. (Defendant's
exhibit 61.) The page one of this plat is the basement. Page two
is the first floor; the dimensions of the elevator shaft are six by
eight and back of the trap door, as shown on the plat, is a ladder
going to the basement. The size of the trap door is 3 feet by 3 feet
and three inches. It is 136 feet from the elevator shaft to the
place where the body of the young lady is said to have been found,
and 80 feet from the front of the elevator shaft to the trash
pile and 90 feet from the elevator shaft to the boiler, and 116 feet
from the elevator shaft to the colored people's toilet. It is 135
feet from the elevator to the back stair way. The chute as shown on
the page 2 of the plat is five feet wide and 15 or 20 feet long.
It empties upon a platform in the basement about eight or ten feet
