of 4374 gross. Now, there is another little slip of paper (Deft's Ex. 4a) here that requires one of the most complicated calculations of this entire financial, and I will explain it. It shows the repack, and I notice an error on it here, it says here 4-17, when it ought to be 4-18; in other words, it goes from 4-17 through 4-24. That repack is gotten up by Miss Eula May; you will notice it is O.K.'d by her. Miss Eula May Flowers, the forelady, packed that; that is the amount of pencils used in our assortment boxes or display boxes. That is one of the tricks of the trade, when we have some slow mover, some pencil that doesn't move very fast, we take something that is fancy and put some new bright looking pencils with them, with these slow movers. That is a trick that all manufacturers use, and in packing these assortment boxes, which are packed under the direction of Miss Flowers, we send into the shipping room and get some pencils which have already been packed, pencils that have been on the shelf a year for all we know, and bring them in and unpack them and repack them in the display box. Therefore, it is very necessary in figuring out the financial sheet to notice in detail the amount of goods packed and just how many of those pencils had already been figured on some past financial report. We don't want to record it twice, or else our totals will be incorrect; Therefore this little slip (Deft's Ex. 4a) showing the amount of goods which were repacked is very necessary. That was figured by me, and was figured by me on that Saturday afternoon, April 22nd. There were 18 gross of 35-X pencils selling for \$1.25; 18 gross for \$22.50. It shows right here, I figured that out. That is my writing right down there. Eighteen gross 35-X, \$1.25, \$22.50; 10 gross of 930-X figuring at \$25.00;
