

**RE-CROSS EXAMINATION.**

On the first of April he had \$111.13, on the 18th of April he deposited \$15.00. That is all he deposited that month, and these checks were drawn against that \$111.13 and \$15.00.

R. P. BUTLER, sworn for the Defendant.

I am the shipping clerk of the pencil company. I am familiar with the doors leading into the metal room. They are wooden doors, with glass windows. There is no trouble looking through those windows into the metal room, even when the doors are closed. The glass in the door is about fifteen inches by eighteen inches. Any one of ordinary height can see through them easily.

**CROSS EXAMINATION.**

The doors are six feet wide together. The passageway from the elevator back to the metal room is ten feet wide with the exception of that part where we have some boxes piled up, where it is about six feet wide. The boxes go to the ceiling on the one side. It is not particularly dark there. I measured the width of the metal room doors. They were six feet wide exactly from jamb to jamb. The doors are usually open. If any one came up the stair case and turned to the office, they could see through the metal room doors. The floors of the metal room are very dirty. I don't know if the windows are clean, but you can see through them.

I. U. KAUFFMAN, sworn for the Defendant.

I made a drawing of the Selig residence on Georgia Avenue, in this city, showing the kitchen, dining room, the reception room, parlor and passageway between the kitchen and dining room. The mirror in the dining room is in the sideboard as shown on the plat (defendant's exhibit 52). It is fourteen feet from the kitchen door to the passageway in the dining room and the passageway is a little over two feet. Standing in the back door of the kitchen room against the north side of the door, I could not see that mirror, because of the partition between the passageway and the dining room. On the south side of the kitchen door you would have less view than on the north side and could not see the sideboard wherein the mirror is located at all. It is 175 feet from the Selig home to the corner of Washington and Georgia Avenue and 271 feet from the Selig home to corner of Pulliam St. and Georgia Avenue, as shown on the plat (Defendant's exhibit 53). I made a plat of the National Pencil company plant on Forsyth St. (Defendant's exhibit 61). The page one of this plat is the basement. Page two is the first floor; the dimensions of the elevator shaft are six by eight and back of the trap door, as shown on the plat, is a ladder going to the basement. The size of the trap door is 2 feet by 2 feet and 3 inches. It is 136 feet from the elevator
